KURSANALYS

- kursansvarigs summering och reflektioner

The strength of the course is the strong group project component that allows for collaborative learning and practical experience with the course material. The recorded videos gave the students more opportunities for learning.

Kursens svaga sidor utifrån kursvärderingen och lärares reflektion, även i förhållande till de förändringar som genomförts inför kursomgången

Due to covid-19, all interactions have been online. On average, the interaction with the students has slightly decreased when compared to the last round. Moreover, take-home problems have been assigned for the final assessment. Here, collaboration was not allowed, but could not be monitored.

Ansvarig lärares sammanfattande synpunkter

Overall, the course was a success. The recorded videos and the live sessions helped significantly. The interaction with the students has slightly decreased when compared to the last round. Students were slower to complete the course, i.e., worked on the final take-home problem set several months after the end of the course. In the end, 19 out of 20 students completed the course successfully. 80% completed the course successfully right after the first final take-home problem set at the end of the course.

Förslag på eventuella förändringar av kursen

The recorded videos give the students more opportunities for learning. The goal is to offer the videos also in future course rounds.
