- formulate criterion-referenced grading criteria for a course,
- suggest how items of the examination should be designed so that they assess according to the grading criteria,
- review critically grading criteria,
- account for different ways to combine grades to a final grade and which effects these can give.

### Teachers

- Viggo Kann, CSC/ECE, teacher and examiner
- Anna-Karin Högfeltdt, ECE, teacher

- **General guidance at UCD, Dublin.** A table with the levels A-F described. Should be helpful for a first general idea on how to distinguish the levels. Not related to a specific discipline.

- **Lab Report Rubric.** This seems like a well designed grading rubric. The lab course is described, together with the ILOs. The scale 0-3 is applied on the eight types of criteria used. How the criteria relate to the ILOs is shown, together with the formula for the final scoring. All in all, this rubric looks like what you are expected to develop for your course (or course module) within this course (LH216V).
