PRACTICAL INFORMATION	11

COURSE GOALS AND STRUCTURE

Intended learning outcomes

The purpose of the course is to give basic knowledge on sustainable development, mainly in relation to environmental problems and social aspects. ICT (information and communication) solutions may be used to make resource use more efficient and may make possible changes in processes and practices for sustainable development, but may also cause increased environmental problems and negative social impacts. Within the course we will reflect on different opportunities and problems related to ICT-solutions and these will be illustrated with concrete examples from the sector. There will be discussions on how sustainable development could be facilitated by ICT-solutions, and the aim is that you will later be able to use your knowledge in order to support sustainable development in your daily profession.

The course goals are that the student after taking this course will be able to:

- 1. present and problematize the concept of sustainable development, mainly in relation to environmental problems and social aspects,
- 2. present and problematize political goals for sustainable development that are set in society,
- 3. describe and discuss different environmental and social problems in society where ICT-solutions could be useful,
- 4. on a generic level analyze environmental consequences of ICT-solutions/applications with a systems perspective,
- 5. understand that environmental and sustainability problems are often complex and may be inadequately defined, and sometimes give rise to goal conflicts, and
- 6. use knowledge on sustainable development in situations where ICT-solutions are planned, developed or used, suggest ways to integrate this perspective and reflect on the potential in innovation.

Course content

The course includes lectures, seminars incl. minor writing assignments that are linked to the lecture content, a group project assignment performed in collaboration with industry or research groups, and an individual literature assignment.

Lectures cover:

- The concept of sustainable development, national and international sustainability goals, and sustainability problems and challenges
- ICT and sustainable development how ICT may be a positive driver for sustainable development, but also mean risks and negative impacts
- Sustainable innovations and business opportunities
- Sustainability assessment with systems perspective

EXAMINATION AND GRADING CRITERIA

The final grade is calculated as the average of the Literature assignment and the Project assignment (equal weight).

PRO1: Project (4 credits, A-F)

The project is carried out in groups of five, on a topic provided by a company or organisation. It combines knowledge about sustainable development taught in this course with ICT knowledge and skills from previous parts of your educational programme.

- Detailed instructions for project work are found in a separate document: "Project instructions"
- Please check the different deadlines for project drafts etc in Canvas.
- Report content and quality, as well as work process, count for the final grade.
- Attendance at project seminars and supervision meetings is compulsory. If you cannot attend, contact the course responsible for a supplementary assignment.
- Project is graded A-Fx. Fx means that at least one aspect of the project is incomplete and must be supplemented. After supplementing only grade E will be given that specific aspect.

INL2: Response papers and thematic seminars (0.5 credits, P/F)

Response papers are prepared in advance of and discussed during two thematic seminars. Feedback on response papers is provided through discussions at the thematic seminar.

- Please check the deadline for response papers in Canvas.
- Attendance at thematic seminars is compulsory.
- If you cannot attend, contact the course responsible for a supplementary assignment.
- Response papers are graded as Pass/Fail.

INLA: Literature assignment (2.5 credits, A-F)

The literature assignment covers material from lectures, thematic seminars, the course literature, and your own literature search.

- Please check the deadline for the literature assignment in Canvas.
- Literature assignment is graded A-Fx. Fx means that the assignment is incomplete and needs to be supplemented within six weeks. After supplementing from Fx, only grade E will be given.
- If you do not complete the literature assignment, you need to re-register for the course next year to submit.

NÄR1: Attendance at lectures (0.5 credits, P/F)

Active participation at lectures is important, since it will help you to perform well on the response papers, project, and literature assignment.

- Attendance in lectures is compulsory.
- Absence from <u>maximum two</u> lectures is allowed. If you are absent from more than two lectures, contact the course responsible for supplementary assignments.
- Attendance is graded as pass/fail (P/F).

LECTURES & SEMINARS

Please see the online schedule for exact day and time of each lecture.

The indicated literature for each lecture serves as complement to the lecture and should be used as reference material for writing assignments in the course. You are not expected to study and learn all the content.

LECTURE 1 course intro- duction	Practical information about the course and information about projects and how to select projects. If you miss this lecture, it is important that you get in touch with the course co-ordinator asap.
	Lecturer
	Anna Björklund
LECTURE 2 Sustainable de- velopment	The concept of sustainable development is introduced and problematized. What does it mean and what are its implications? What are current challenges within the areas of environment and sustainability?
	Lecturer:
	Elina Eriksson, Media Technology and Interaction Design
	Reference material:
	Johan Rockström (2015) Sommar i P1, 12 juli 2015
	 Swedish: <u>http://sverigesradio.se/sida/avsnitt/571827?programid=2071</u> English: <u>http://sverigesradio.se/sida/avsnitt/595082?programid=2071</u>
	Johan Rockström (2019) Vinter i P1, 28 december 2019
	- Swedish: <u>https://sverigesradio.se/avsnitt/654724</u>
	- English: <u>https://sverigesradio.se/avsnitt/1425542</u>
(online): Plan- etary bounda-	the week. It goes into depth on the topic of environmental and social planetary bounda- ries.
ries	Videos:

LECTURE 4	The social dimension of sustainability is introduced and discussed.
Social sustain- ability	Lecturer:
	Elisabeth Ekener Department of Sustainable development, environmental science and engineering
	Reference material:
	 Bhutan's 'Gross National Happiness Index': <u>https://www.youtube.com/watch?v=X8MYtCzBiDA</u> Richard Wikingson, about equality <u>https://www.ted.com/talks/richard_wilkinson?language=en</u>

LECTURE 5 Starting up of group projects	Information about your project and project groups. All groups will start planning for their project work.
	It is very important that you attend this meeting! If you miss this meeting, it is important that you get in touch with the course coordinator asap.
LECTUDE	
LECTURE 6	This lecture consists of online material only. It covers informal recycling of electronic
(online): Elec-	waste in developing countries, which has serious environmental and social conse-
tronic waste	quences. The literature also includes information of current Swedish formal recycling of
	electronic waste.
	Video:
	 Exporting Harm: The High-Tech Trashing of Asia" (Basel Action Network) <u>https://www.youtube.com/watch?v=yDSWGV3jGek</u>

(2011) <i>Energy Use and Environmental Impacts of the Swedish Building and Real Estate Management Sector</i>. Journal of Industrial Ecology, 15(3), 394-404. Sections 2.2 + 2.2.1 in: Brown, N. (2017) <i>Managing high environmental performance? Applying life cycle approaches and environmental certification tools in the building and real estate sectors</i>. Doctoral thesis in Planning and Decision Analysis with specialisation in Environmental Strategic Analysis, KTH. Broms, L., Katzeff, C., Bång, M., Nyblom, Å., Ilstedt-Hjelm, S. and Ernberger, K. (2010): "Coffee maker patterns and the design of energy feedback artefacts". Proceedings of <i>DIS '10 The 8th Conference on Designing Interactive Systems (DIS)</i>, Århus, Denmark August 2010, ACM.

	 Tirado Herrero, Sergio, Larissa Nicholls, and Yolande Strengers. 2018. "Smart Home Technologies in Everyday Life: Do They Address Key Energy Chal- lenges in Households?" Current Opinion in Environmental Sustainability 31: 65–70.
PROJECT	In this seminar, project groups present and get feedback on their project outline.
SEMINAR 1: Project outline	Preparation: Read and follow instructions for Project seminar 1 (see separate document "Project instructions").
LECTURE 11 Transport sec- tor – Environ- mental chal- lenges and ICT solutions	 The lecture describes the transport sector, its sustainability challenges and examples of ICT solutions to address these challenges. <i>Lecturers:</i> Jonas Åkerman, Department of Sustainable development, environmental science and engineering Anna Kramers, Department of Sustainable development, environmental science and engineering <i>Reference material:</i> Åkerman (2011) <i>Transport systems meeting climate targets – A backcasting approach including international aviation</i>. Doctoral thesis, KTH Royal Institute of Technology (Chapter 1.1 Background & Chapter 6 Future transport systems meeting climate targets.) Kramers (2014) <i>Designing next generation multimodal traveller information systems to support sustainability oriented decisions</i>, Environmental Modelling and Software
LECTURE 12 Food sector – Environmental challenges and ICT solutions	 The lecture describes the food sector, its sustainability challenges and the development of ICT solutions to address these challenges. <i>Lecturer</i>: Rebecka Milestad, Department of Sustainable development, environmental science and engineering Björn Hedin, Department of Media Technology and Interaction Design (MID) <i>Reference material:</i> Gordon et al 2017. Rewiring food systems to enhance human health and biosphere stewardship Environ. Res. Lett. 12 100201 Zapico, J., Katzeff, C., Bohné, U. and Milestad, R. (2016): Eco-feedback visu-
	alization for closing the gap of organic food consumption. In <i>Proceedings of the</i> 9th Nordic Conference on Human-Computer Interaction.
LECTURE 13 (online): Sus- tainability management	This lecture consists of online material. Responsible leadership of a company or an or- ganisation requires management of social responsibility and environmental issues. Sup- port for this can be provided through various types of management systems and guide- lines. This lecture (consisting of online material) introduced ISO 14001, a standard for environmental management. <i>Video</i> ISO 14001 EMS certification requirements presentation https://www.youtube.com/watch?v=spjwQX-acnA
	Kejerence material:
	USEPA. Learn About Environmental Management Systems. <u>https://www.epa.gov/ems/learn-about-environmental-management-systems#what-is-an-EMS</u>
LECTURE 14 The energy sector – Envi- ronmental	The lecture describes the energy sector, its sustainability challenges and the development of ICT solutions to address these challenges. <i>Lecturer:</i>

challenges and ICT solutions	Oleksii Pasichnyi, Department of Sustainable development, environmental science and engineering
	Reference material:
	Claesson and Poutré (2014) <i>Towards a European Smart Energy System. ICT innovations goals and considerations.</i> EIT ICT Labs.
THEMATIC	This thematic seminar concerns material covered in lectures L6 – L12.
SEMINAR 2	Preparation : Read the instructions in Canvas and submit your response paper in Canvas/Assignments.
	NOTE: Deadline indicated in Canvas/Assignments.
LECTURE 15: Sustaina- bility-driven innovation and	Environmental and resource problems are the biggest challenges of our time, and they call for new business models. The lecture covers innovation theory, examples of sustainability driven business. KTH Innovation gives examples of how they provide support to bring ideas to market.
opment	Lecturers:
Spinon (Emrah Karakaya, Assistant professor, Department of Industrial economics and management Lykke Westgren, Business Coach - Sustainability, KTH Innovation
	Reference material:
	 Nidumolu, R., Prahalad, C.K.and Rangaswami, M.R. (2009) Why Sustainability Is Now the Key Driver of Innovation. <i>Harvard Business Review</i>, September 2009. Keynheim, F., Lundharg, P.S. (2020) Difference. In: Kehrmerkin A. (Ed.). Intern
	 Karakaya, E., Lundberg, P.S. (2020) Diffusion. In: Kobayashi, A. (Ed.), <i>International Encyclopedia of Human Geography</i>, 2nd edition. vol. 3, Elsevier, pp. 311–315 Geels, F.W., Sovacool, B.K., Schwanen, T. and Sorrell, S., 2017. Sociotechnical transitions for deep decarbonization. <i>Science</i>, 357(6357), pp.1242-1244.
PROJECT SEMINAR 2 Peer assess- ment	In this seminar, each group is assigned the draft report of another group to assess, using the grading template. The assessment by another group does not constitute a formal basis for a grade, but it will be helpful in improving your reports.
LECTURE 16 Scenarios and cities – ICT and sustainable development in the city	This final lecture covers examples of challenges for sustainable development in cities. What kind of opportunities and difficulties may be entailed by ICT solutions?
	 Prel: Jo Arne Lindstad, Global Head of Smart & Sustainable Cities, Ericsson Mattias Höjer, Department of Sustainable development, environmental science and engineering
	Reference material:
	Höjer, M. och Wangel, J. (2014) <i>Smart sustainable cities – definition and challenges</i> . In: Hilty, L.M., Aebischer, B. (eds.) ICT Innovations for Sustainability. Advances in Intelli- gent Systems and Computing 310. Springer International Publishing.
PROJECT SEMINAR 3: Final presenta- tions	In this seminar, project groups present their final reports and give feedback on the report of another group.
	<i>Preparation</i> : Read and follow instruction for Project seminar 3 (see separate document "Project instructions").
COMPENSA- TION SEMI- NAR	Students who were not able to attend one of the thematic seminars will be called to com- pensate at this seminar.

COURSE LITERATURE/REFERENCE MATERIAL

The course literature for each lecture is listed in the overview of the lectures above. All course literature is available in Canvas (Modules) or can be downloaded from the internet.

Use the indicated literature as reference material/sources of information when you work in projects, write your literature assignments and prepare response papers for the thematic seminars. You are not expected to read everything in detail and memorize specific facts.

PRACTICAL INFORMATION

Registration

Register on-line for the course at the kth.se website. If you encounter problems when registering, please contact the course coordinator.

If you are not registered, you will not have access to Canvas and cannot attend the course.

Need for special aid (FUNKA)

https://www.kth.se/en/student/studentliv/funktionsnedsattning

If you have a disability, you may receive support from Funka.

You must inform the teacher regarding any need for extra support that you have. Funka does not automatically inform the teacher.

Academic dishonesty and plagiarism

https://www.kth.se/en/student/studentliv/studentratt/fusk-och-plagiering-1.323885

Response papers, literature assignments and project reports, which are not independently and self-authored, will be considered as cheating and may be reported to the board of discipline.

"Independently and self-authored response papers", should be understood as freely written papers, without plagiarizing structure or contents from already existing work. If the author's writing is supported by existing work, source references and notes MUST be provided. All quotations must be correctly formatted according to common rules for writing.

Please note that plagiarism control always is carried out for all project reports and literature assignments.

Upping and appealing a grade

Rules for upping and appealing grades apply according to student rights at:

 $\underline{http://www.kth.se/en/student/studentliv/studentratt/overklagan-overklagande-av-myn-dighetsbeslut-1.323892}$
